4630/4630SW IP Telephone

4630/4630SW Web Application SDK Description

Issue 1.8
June 2003

This document describes the following 4630/4630SW Web Application Software Development Kit (SDK) contents and provides URLs to access these documents and sample code.

The following are the new features in 1.8 Release of the 4630 Software:

- "Click to Dial" capability for Web Application
- Larger Browser Window on Web Application
- Enhanced local dialing lets you dial directly from Web App, Directory App, and Call Logs without any modifications to the telephone number strings.
- User Customizable Label on Feature Button
- Phone Tab brings you to the Phone App Screen from the Web App
- 4630SW – New Wireless Headset Support

The 4630/4630SW SDK contains the following:

- **LAN Administration Guide** - this section discusses all the ***HTML tags*** that are supported as well as how they are rendered on the phone:
  - PDF version
  - Zip format

- **4630/4630SW User's Manual**:
  - PDF version
  - Zip format

- 4630/4630SW IP Telephone R1.8 Online Help

- **Sample Home Screen and web application** - the user has a choice to either use the 4630/4630SW web pages hosted on support.avaya.com site or to receive these web pages in a zipped form. The URL for the hosted site is pre-configured in the 46xxsettings.txt script file. Directions to use the zipped document can be found in the readme file.
  - **4630/4630SW (HTML) Avaya Hosted site** - http://support.avaya.com/elmodocs2/avayaip/4630/index.htm
  - **Zipped pages –** http://support.avaya.com/elmodocs2/avayaip/4630web180.zip

The documents above can all be found on the **Avaya Support Center** web site, by navigating to our web site as follows:

- Go to http://support.avaya.com/,
- Click on **Telephones Devices & User Agents,**
- Click on **4600 Series IP Telephones**.
- The documents listed on this page are mostly under **SDK and Browser Information**.

You can also use the following navigation scheme:

Follow this Navigation: Home > Support > Technical Database > Telephone Devices & User Agents > IP Telephones & User Agents > 4600 Series IP Telephones > SDK and Browser Information
